Michael Chao

CORE PRECALCULUS

What is Core Precalculus?

- ⦿ “Core” concepts for advanced work in math
 - Various types of functions and their properties
 - More trig, including analytic trig
 - Matrices
 - Probability
- ⦿ More moderate pace than Advanced Precalculus

I appreciate students who...

- Share their ideas
- Are not afraid to be wrong
- Explore multiple ways of doing a problem
- Learn from each other as well as from the teacher
- Know when to ask for help, and when to offer it

Goals for the year

- ⦿ Improve mathematical skills and conceptual understanding
- ⦿ Gain confidence
- ⦿ Have a challenging and enjoyable year of learning math together
